

'LIVE' DEMONSTRATION ARENA – PROGRAMME

Tuesday 8th March

Company	Session Abstract	Speaker	Start	Finish
UK Border Force	Members of Border Force Freight Search trainer team will demonstrate the skills used to detect concealments within a number of adapted vehicle parts. Border Force handlers will show how their dogs can assist with these detections and also identify drug carriers in a port environment.	Barry McHugh	10.30	10.45
Symetrica	The VeriFinder handheld radio-isotope identifier (RIID) is being launched at the exhibition. A simulated search of an air freight warehouse will be used to demonstrate detection, location and identification of multiple radioactive sources with real time reach back to a remote command and control system.	Dr Geraint Dermody	11.00	11.15
RTP UK Ltd	RUSTA has trained a number of drone operators for police forces for which it has developed an advanced course that includes bespoke elements as well as the PFAW qualification as approved by the CAA. RUSTA will explain the advanced course and demonstrate its own Hydro Stricter drone, which has an all-weather capability ideal for police and security operations.	Mike Horton/ Sion Roberts	11.30	11.45
CrisisCast	CrisisCast demonstrates their unique method of delivering high-impact, memorable scenario training for emergency and incident response.	Brian Mitchell	12.00	12.15
Scanna MSC	Scanna will be demonstrating how their portable x-ray systems can be used to help detect concealed IED's, weapons and narcotics hidden within vehicles and cargo. Products demonstrated include the Scan-X scout and the award winning Flex-ray system which are used globally by search and border security teams.	Paul Taylor/ John Anderson	12.30	12.45
Cerberus Black	The A-WASP®, Acoustic Warning Signal Projector, is a man-portable, high-powered audio communications tool for the Police. Highly directional, it works within UK Health & Safety law, with every acoustic emission recorded by an integral video camera along with further telemetry to prove it. It is intended as an alternative to using force.	Glyn Buckler	13.00	13.15
Search Systems Ltd	Search Systems will demonstrate three of their products and their unique user enhanced mobile ground stations. The products are: SPARROWHAWK drone capture and recovery system, ROVER 600 Unmanned Guided Vehicle (UGV) for live video and data from unsafe or toxic areas and OBSERVER A300 aerostat camera system for wide area monitoring.	Paul Trimble	13.30	13.45
Cobalt Light Systems	Cobalt launches two new detection systems that operate through coloured and opaque barriers. Insight200™ is an easy-to-operate liquids screening system for fixed security checkpoints such as airports. Resolve™ is the world's only handheld SORS spectrometer allowing identification of explosives, narcotics, NPS and hazardous chemicals in a variety of scenarios.	Robert Stokes	14.00	14.15
Dog Section UKBF/Wagtail	Wagtail UK will demonstrate the capabilities of a detection dog. The dog and handler will search/screen a number of boxes/cases/items in the Demo Arena. When the dog detects the presence of a hidden scent the handler will reward the dog. Wagtail will welcome any questions during or after the demonstration.	Collin Singer	14.30	14.45
LGC - ParaDNA	The ParaDNA® System generates DNA profile information in 75 minutes. Military/police use has demonstrated its utility for developing early tactical intelligence at the point of need, via onboard ParaDNA Software, that allows immediate search/compare functionality of DNA profiles captured from blood, saliva, semen, touch-DNA or imported from external databases.	Laura Dodd/ Paul Rendell	15.00	15.15
GSS Canine Services	GSS are fast becoming the leading provider of explosives detection dog handler teams across the UK and provide highly trained explosive detection dog teams to support the Home Office, police and private sector. The demonstration will focus on detection of concealed explosives within cargo using a specially trained dog handling team.	Daniel Mailley	15.30	15.45

Wednesday 9th March

Company	Session Abstract	Speaker	Start	Finish
UK Border Force	Members of Border Force Freight Search trainer team will demonstrate the skills used to detect concealments within a number of adapted vehicle parts. Border Force handlers will show how their dogs can assist with these detections and also identify drug carriers in a port environment.	Barry McHugh	10.00	10.15
Domo Tactical Communications	The throw ball is a rapid deploy, self-righting PTZ camera and transmitter, for remote monitoring with ranges typically up to 200 meters NLOS and significantly further LOS. Complete with three hour battery life, this portable system is an effective addition to tactical teams in the field monitoring and protecting critical routes, particularly in porous border areas.	Andrew Tilbury	10.30	10.45
Search Systems Ltd	Search Systems will demonstrate three of their products and their unique user enhanced mobile ground stations. The products are: SPARROWHAWK drone capture and recovery system, ROVER 600 Unmanned Guided Vehicle (UGV) for live video and data from unsafe or toxic areas and OBSERVER A300 aerostat camera system for wide area monitoring.
